

Slip Pack

Black Label is super hydrophobic! It also grips very well to the bottom of your shoes. However, it does not grip well to the bottom of your feet. Are you wanting to apply Black Label in your shower or on your pool deck? Great! We have the solution, use our slip pack!

- The Slip Pack is like little grains of salt that your feet can grip on to.
- Broadcast it directly into the Black Label while it's still wet.
- Don't worry anymore about slipping!
- The ratio is about 3.5 OZ per 1000 Square Feet
- Throw it on, or shake it on with a salt shaker!

I'm sure you're already thinking of a surface that's slippery when wet, fix that today with Black Label and our Slip Pack!
